

CALIBRAGE INFO SYSTEMS PRIVATE LIMITED

C O M P A N Y P R O F I L E

Mogalipuvvu Venkata Srinivasa Rao

Managing Director and CEO

Mogalipuvvu Venkata Srinivasa Rao, the Managing Director and CEO of Calibrage Info Systems Private Limited, is the driving force behind the company's inception and growth. His entrepreneurial journey began in February 2014, when he founded Calibrage with a vision to provide cutting-edge technology solutions and services. Starting with a single employee, Mr. Mogalipuvvu Venkata Srinivasa Rao strategic vision and leadership enabled the company to grow steadily despite various market challenges.

Mr. Mogalipuvvu Venkata Srinivasa Rao educational achievements and continuous quest for knowledge have been instrumental in shaping his strategic approach to business development and operational excellence. His ability to combine technical expertise with visionary leadership has been a cornerstone of Calibrage's success.

As the MD and CEO, Mr. Mogalipuvvu Venkata Srinivasa Rao leadership style is characterized by his hands-on approach, inclusive decision-making, and a relentless focus on quality and customer satisfaction. His strategic initiatives have not only steered the company towards growth but have also fostered a culture of innovation and excellence.

Global Expansion: California Branch-USA

We are excited to announce the opening of Calibrage's newest branch in California, USA. This strategic expansion reflects our commitment to enhancing our global presence and providing localized support to our clients. This milestone not only strengthens our position in the market but also reaffirms our mission to be a trusted global partner in technology.

Under the leadership of Managing Director Mogalipuvvu Venkata Srinivasa Rao, the California branch reflects our commitment to providing exceptional solutions and meeting the diverse needs of businesses worldwide. Together, our branches work in harmony to uphold our standards of excellence and drive growth across borders.

Calibrage LLC: Delaware Branch-USA

We are thrilled to announce the establishment of Calibrage LLC as part of our global presence with our Delaware branch in the USA. This strategic expansion complements our California operations and further strengthens our service capabilities within the North American market. Under the visionary leadership of Managing Director Mogalipuvvu Venkata Srinivasa Rao, this Delaware location represents another significant milestone in our global growth strategy. The new branch will enhance our ability to deliver personalized technological solutions to clients while maintaining the exceptional quality standards and innovative approaches that define Calibrage. This development further demonstrates our commitment to becoming a comprehensive technology partner with strategic locations that enable us to better serve diverse business needs across the United States and beyond.

Introduction

Thank you for your interest in Calibrage Info Systems.

The information contained in this packet provides you with a brief introduction to who we are, what we do, and how Calibrage Info Systems can be of value to your business. To accomplish this, we present an overview of our services, highlight our capabilities, and offer some brief examples of our experience.

Because every client's project poses its own set of unique challenges, it is impossible to compose one document that completely addresses everyone's specific needs. What we have attempted to do in the following pages is simply provide a glimpse into some of our capabilities. Calibrage Info Systems is a full custom services firm. As such, it's our business to quickly adapt to meet our clients' diverse needs... and we have a proven track record of doing just that.

We are always interested in exploring new projects, so if you're interested in discussing your particular development challenges with us, please contact us at: +91-40-48525410, +91 99599 35410 or reach us at info@calibrage.in or info@calibrage.us. We're confident that our staff of experienced professionals can be a valuable addition to your team.

Corporate Overview

Who we are...

OUR PRODUCTS

We offer an integrated suite of smart, industry-focused solutions designed to optimize operations, ensure compliance, and boost productivity across sectors like food & beverage manufacturing, agriculture, and enterprise management. From inspection tools that guarantee hygiene in production units to advanced tracking and HR systems that streamline workforce management, our products are built to solve real-world challenges with precision and simplicity.

For the food and beverage industry, our CIP–Clean-In-Place and Inspection Pro systems ensure sanitation and inspection processes are thorough, efficient, and fully compliant with safety standards. SGT–Smart Geo Track helps organizations monitor field staff in real time, offering insights into performance and location to improve accountability and planning. In agriculture, Palm 360 offers end-to-end management for palm farming—from cultivation to harvest—bringing data-driven insights to traditional farming. Meanwhile, our comprehensive HRMS streamlines every aspect of human resource management, from recruitment and payroll to performance tracking.

Whether you're managing a manufacturing plant, a remote workforce, or a palm plantation, our solutions are designed to scale with your business and simplify your operations—all while helping you stay ahead of compliance and performance goals.

OUR CLIENTS

Almost every company has something about client focus in its mission statement. The larger the service organization, the more executives tend to insulate themselves from clients. Some rely on client-satisfaction surveys and focus groups.

We understand that our clients work with all sorts of business sectors and industries and may be senior managers, middle management or junior staff members. They have different business goals, with different needs, even their cultures and their business environments might be different. Despite these differences they share a number of common goals. They may wish to develop a competitive edge to maintain their business growth in increasingly competitive work environments.

We are proud to provide our services to various clients for business development. Some of our clients are...

OUR PRODUCTS

Product #1: SanitizationPro™ - Unparalleled Insight into Your CIP

Product Of: **Calibrage Info Systems Pvt Ltd**

Calibrage SanitizationPro™ automatically generates wash records and inspection records, and provides unparalleled insight into your CIP process. Providing visibility from the plant floor to the corporate office, Calibrage SanitizationPro™ monitors every step of every wash. Automated data collection generates wash records in real-time using benchmarks, baselines, dashboards, alerts and exception reporting to drive consistency, quality and cost reduction. Set up prediction based rules to provide early warnings, or action limits, in advance of exceeding a legal compliance or quality violation. And when the process is complete, Calibrage SanitizationPro CIP management solution allows you to access FDA validated compliance reporting when and where you need it, with automatic backup, filter, search and sort delivered with the latest in mobility.

- Data-driven process improvement
- Minimize CIP Time
- Maximize Safety
- Real-time monitoring
- Optimize CIP costs
- FDA Validated compliance reporting

Product #2: InspectionPro

Product Of: **Calibrage Info Systems Pvt Ltd**

Calibrage InspectionPro—an affordable, easy-to-use application that streamlines your inspection and audit processes. With Inspection Pro, you can manage your inspections more efficiently using a PC, tablet, or smartphone. Capture your entire inspection process electronically and securely with a simple, one-click interface. Create and store audit-ready, comprehensive electronic inspection reports. Identify inefficiencies and track performance with built-in analytics. At Calibrege, we're committed to developing software solutions that help food and beverage process manufacturers make data-driven decisions to maximize quality, productivity, and profits.

Product #3: ReceivingPro™ - Optimize Your Receiving Operations

Product Of: **Calibrage Info Systems Pvt Ltd**

Calibrage ReceivingPro™ a Receiving Management Solution Designed for Food & Beverage Manufacturers. With Calibrage's new ReceivingPro™ receiving management solutions you can capture your entire receiving process electronically and securely, with reporting and analytics that can help drive continuous improvement. Now you can optimize your receiving operations, to help maximize quality, productivity and profits. Key features and benefits include:

- Track performance by carrier, load, bay, and operator
- Manage load variance and chargebacks
- Track receiving performance to planned schedule
- Track load test results (Cryo, PCM, DCM, SEC)
- Monitor Accept/Reject rates; analyze trends, and more

Product #4: TracePro™ - Monitor Product Flow Throughout Your Plant

Product Of: **Calibrage Info Systems Pvt Ltd**

Calibrage TracePro™ automatically monitors and records the flows of product through your plant, enabling customers to trace product forward and backward from any point in the plant. Calibrage TracePro™ allows you to quickly locate all finished product containing ingredient from a particular supplier, lot code, or date range. A simple to read graphic visualization identifies the point of origin, to immediately isolate all products that could have been affected, as well as the process path unique to the parameters in question. All co-mingling, by-products, and mixed lots are quickly and securely identified, and wash records are fully integrated and accessible with the unit analysis.

- Connects to any plant hardware and software
- Patented genealogy optimized for complex manufacturing
- Integrated views of production, cleaning, test data
- Easy to use case analysis for all types of threats
- Intuitive search tools with point of origin reporting

Product #5: Palm 360°

Product Of: **Calibrage Info Systems Pvt Ltd**

Palm 360° is a comprehensive digital solution for palm farming management. It presents a complete ecosystem consisting of four integrated applications that cover the entire palm cultivation process from nursery to harvest and mill processing.

A complete end-to-end solution for palm farming Four clearly defined modules:

- **Palm Root:** Nursery management with 100+ activities tracking
- **Palm Grow:** Field management for maximizing yield and productivity
- **Palm Collect:** Harvest automation for fruit collection and processing
- **Palm Mitra:** Farmer-focused app for transactions and labor management

Product #6: HRMS - Human Resource Management System

Product Of: **Calibrage Info Systems Pvt Ltd**

A comprehensive Human Resource Management System (HRMS) designed to streamline HR operations, automate workflows, and enhance employee experience. The platform manages employee data, attendance, payroll, recruitment, performance, and more—all in one centralized solution.

- **Employee Management:** Centralized employee database with detailed profiles.
- **Attendance & Leave Tracking:** Real-time tracking with automated leave approvals.
- **Payroll Integration:** Accurate, compliant, and automated payroll processing.
- **Recruitment Module:** End-to-end hiring management from job posting to onboarding.
- **Self-Service Portal:** Empower employees to manage their own HR tasks.
- **Reports & Analytics:** Insightful dashboards for data-driven HR decisions.
- **Secure & Scalable:** Role-based access and scalable architecture for growing teams.

Product #7: SGT - Smart Geo Track

Product Of: **Calibrage Info Systems Pvt Ltd**

SGT - A self-Service comprehensive Field Agent/Sales force management solution from Calibrage Info Systems. The feature rich and simple to use Android based SGT App continuously interacts with cloud hosted web based software to streamline the connectivity between Sales Team. Field Agents or sales force can use the mobile application to write Logs from the field, create contact list, and Generate leads from the field.

The Sales Manager (Admin) will have the privilege to monitor the movements on the map from web based software by leveraging GPS Location. The Online-Offline base mobile app collects the Log based attendance chart for sales Managers. Sales Manager will have the freedom to qualify the leads generated by the sales team.

Product #8: I Support Farming - Crop Management Application

Product Of: **Calibrage Info Systems Pvt Ltd**

The main idea of this application is to support Investor (who invested money in farming). The main objective of the Application is to monitor each step involved in contract farming like Farmer Registration, Farm Registration, Harvest Management, Crop Collection, Area Extension, taking Geo Location of Plot, Payments and more. Android Application is used by the representatives for registration purpose of farmers plots. Geo Location of plot is taken through the android application.

Product #9: Telugu Churches – Blog for Prayer Audios, Videos, Upload & Download Bible

Product Of: **Calibrage Info Systems Pvt Ltd**

Telugu Churches – Telugu churches is a blog which has audios, videos and bibles to use by the end user from a particular Church. The churches or the pastors get registered in the telugu churches in which they create a channel for uploading audios, videos and bible that can be subscribed by the users to get updates from the channel. User can download the bible and quotes. Individual donations can be paid through credit or debit card, direct from the website telugu churches to particular Church.

OUR PROJECTS

Project #1: SafetyChain

Client: **SafetyChain Software, Inc (USA)**

SafetyChain is a digital plant management platform that unites quality and production teams with real-time data, replacing paper systems for enhanced visibility and control in food manufacturing.

We provide comprehensive services for SafetyChain, focusing on streamlining production and quality processes through automation and data-driven solutions. Our offerings include event management for production, downtime, and quality, integrated with IoT data for real-time insights. We design and implement efficient data storage and analytics systems, including interactive visualizations and tailored reports, to enhance operational visibility.

Project #2: XProtect® – Chargeback management software

Client: **Xcaliber Solutions Inc. (USA)**

XProtect® Program to effectively manage risk and then monitors those accounts to ensure long, healthy processing relationships. Xcaliber Solutions, Inc. is directly involved in our clients' day-to-day business details. XProtect® Software provides an effective way of tracking information and customer transaction information. Client: **Jiva Designs Pvt. Ltd.**

Jiva Designs is used as a platform where the Merchant and Buyer can trade to sell and buy the garments.

This project combines the all manufacturing departments Audit, Merchant, Fabric, Styling, and the management. We monitor the entire department on going, processed and hold processes. This will monitor the all garment process in various stages like procurement, designing and pattern making, cutting, stitching, trimming, dying, embroidery, packaging etc. Based on the requirements analysing the order then Accepting and finally making the order process deliver to the customer.

Project #37: Non Voice Process (Chargeback)

Client: **XCALIBER SOLUTIONS. (USA)**

Chargebacks are a normal part of the process of dealing with customers. Credit card companies expect them at a reasonable level and have processes in place to handle them. However, the overall issue of credit card chargebacks has become a massive issue for many sellers and merchants. There are well-known guidelines and best practices that can minimize the number of chargebacks a merchant encounters. However, online merchants face special challenges and cannot apply some basic verification processes to prevent fraud and abuse. That is why chargeback management software is now an increasingly important tool to tackle the chargeback challenge. These three-phases include:

Prevent Chargebacks, Fight Chargebacks, Recover Losses.

Project #38: Hair Fixing Zone

Client: **Hair Fixing Zone**

Hair Fixing Zone mobile app – This is the ultimate solution for cutting-edge hair replacement services in Bangalore. It was established in 2016, and this app has been reshaping the way you address hair loss concerns.
